Left Zamboanga at 10 am  
Sunday, May 6, 1906, on  
U.S.A. Luard. Saw a  
good many white-breasted boobies  
and Great Crested Terns flying or  
floating on logs. No Cetaceans.

May 7, 1906. - Awoke  
at 5 am west of Croquita, in  
sight of Malindang range. Off  
Dumaguete saw a large shark  
that swam a long way with  
dorsal fin high out of water!  
but it soon disappeared.

At Overton saw *Brachyura*  
*Heterochelone chloris*, *Bethyspiza*,  
*Oriolus chinensis*, *Salage terat*,  
*Artamus leucogaster*, *Munia*  
*jayori*, *Hirundo javanica*.

May 8, 1906. - Left Over-  
ton at 8 am. for Misamis.  
Flying fishes very fat & large.

1906. L. J.  
July 8. - Left Zamboanga for  
Manila on U.S.A. Luard  
at 3 P.M. Off NW Mindanao  
saw one Frigate. No  
Terns or Boobies.

July 9. - Saw one large shark  
in Sulu Sea; dorsal fin  
far out of water. As the  
ship passed near its  
fluke ~~was~~ also appeared  
above the surface. Color  
brown. No sea birds.

At evening landed at  
Camp Overton, where I  
saw Green Herons. Many  
Woods swallows chased  
Rollers over Namisan  
R. The Rollers made  
a great outcry, and  
I boarded the *Artamus*,  
*Munia jayori*, *Bolbopsitt*  
*-acus*, *Salage terat*,  
*Hirundo javanica*,  
*Dicurus striatus*,  
*Centropus viridis*, Black  
Cuckoo, *Halcyon chloris*

✓ *Halcastrus intermedius*  
✓ *Leorone philippinus*, Orville.  
July 10. - Landed at Sibon at

9:30 A.M. Went to the  
Sibon Civilian Club.  
Jervoy called for S. & J.  
I stayed up the pole.

(but it was dreadfully  
slippery) ✓ *Munida jagori*?  
Drove about town with  
Major (Dr.) Harris. Saw a  
✓ *Cetropus* <sup>viridis</sup>. Lunched with  
with Dr. H. & his aunt, Mrs. S.

In afternoon  
drove about town and  
in two directions, into  
the suburbs (with Mrs.  
Tutt). Many Sparrows  
in Sibon; also many  
Buds, and Starlings.  
Buds very few. Saw lots  
of Brahmany Kites over  
the harbor. Dr. Harris  
& Miss <sup>drived</sup>  
with us (Lt. Col. Irvine,  
Dr. Thornburgh, ship's  
surgeon.

Collected shells & dried fish.  
Also baskets, also other specimens.  
Major McLean, Chief of Peridore

July 11. - Left Sibon at 12:01  
A.M., after a pleasant  
evening with Capt Jervoy  
on aft upper deck, who  
had been imbibing S. & J.  
(No ladies allowed on upper  
deck.) Jervoy had a  
narrow escape - almost  
fell through the hatch.  
At 7 A.M. anchored in  
front of Ormoc, Id. of  
Leyte. Port beautifully  
located on bluff on  
slightly sloping ground  
2 or 3 miles away. Pretty town.  
Left for Straits of San  
Juanico (N. end) where  
cargo & passengers for  
Tacloban will be  
discharged on launch  
to-night.

[Miss Knox said that  
P. G. was very narrow minded]

At the same time, I did not know  
whether it was a mistake or not. Orville H. Conway.

100 new of Mayon  
height 7086 ft.

July 11th - con

Partnership in journalism  
Messrs (Miss - Mrs - ?) Knox  
and Mearns to date from  
10 A.M. July 11, 1906.

In the late evening we entered  
the strait between Leyte & Samar  
where, in the night a launch  
arrived from Tacloban and  
received freight & passengers.

July 12. - Landed at Camp Cornell  
about 9 am. and left there

about 10 am. Only saw  
a pair of *Haleon chloris*  
and a few *Holothur intermedius*.  
Gathered shells & a few crabs.

Post a level playa,  $\frac{1}{2}$  mile  
from the town of Calbayog  
shaded by coconuts.

One *Sterna bergii* off beach - young.  
No other birds.

July 13. - In early morning  
we got clear view of  
Mts. of Mindoro & sketched  
outline of Haleon. On the  
right, we had a good  
view of the volcano of

Bonajao, Luzon, about  
7000 ft. with a perfect  
cone to the right of it.

About 10 am Haleon  
became obscured by clouds.  
At entrance to Batangas Bay  
passed Verde Id. on left - a beau-  
tiful green island with consid-  
erable cultivation and some  
forest lands, which look as  
though birds would be abundant.  
In Batangas Bay we saw a  
few very large dolphins and  
one large shark. No sea  
bird was seen during the  
day. On our right, in Bata-  
ngas the Taal volcano was  
visible; also a high mt on the  
right (east) of it.

July 14. - Lieut. Jenkins  
of the Cavalry had climbed  
Haleon 8500 ft. he made it.  
He came back sick from  
infected leech bites, which  
made ugly ulcers. Two  
cargadores died from exposure

cut. Halcon

6000 ft. Whitehead

Chart says 8365 ft. Mindoro from the E. July 13, 1906  
Wagon 7986 ft.

Sanjao nearly 7000, Volcano on Luzon.

July 14<sup>th</sup> - Continued  
This news of Perkins's trip  
left Doray gave me which  
he came aboard the  
Seward at Manila this  
morning.

July 15-18. - Stayed at Captain Halsstead  
Doray's house, Military Plaza.

On Monday, July 16<sup>th</sup>, Georgianna  
Doray appeared on the scene.

✓ Brahmany Kites, Tree Sparrows,  
and Minah Birds were the only  
birds observed. Left on Atlantis July 18.

July 19. - Lying in quarantine off  
Maricao. Several Alcedo berghii

✓ Many Brahmany Kites

July 23. - Off Manila saw one  
✓ Great Green Kites & 2 Eagles

July 24. - Anchored off Tacloban  
Did not land.

July 25. - Landed for 2 hours  
off Dulag. Birds were  
identified & identified

✓ Pycnonotus ciavelli

✓ Munia javanica

✓ Leucophaea viridis

✓ Halcyon chloris

✓ Cyrtococcus regularis

✓ Artamus leucorhynchus

✓ Ardeola canadensis - as  
it flew uttered a roosting note

✓ Blue Heron

✓ Gallinula chloropus

✓ Colaptes cafer

Collected 4 Bumblebees

on littoral bean flowers

One escaped from Atlantis.

Collected shells & plants.

Found 4 companies of Ducks

✓ A small brown bird,  
less than Pycnonotus was  
identified as black stripe on  
throat. In unidentified species.

✓ Lophoceros lucorum

✓ Lophoceros philippinus

Note. - Statement of absences  
from Zamboanga gives  
July 27, 1906 as date of  
return to Zamboanga.

Whole trip:

Left Zamboanga July 8, 1906.

Returned " " 27, " "
